

3. Silicon: General Properties and Technologies

3.1 General Properties

3.1.1 Conductivity, Lifetime and Lattice Defects

3.1.2 Diffusion

3.1.3 Mechanical, Thermal, and Other Properties

3.2 Silicon Production

3.2.1 Single Crystals and Wafers

3.2.2 Silicon for Solar Cells

3.2.3 Crystal Lattice Defects in Si

3.3 General Device and Product Considerations

3.3.1 Interfaces and Contacts

3.3.2 Scaling Laws

3.4 Basic Silicon Devices

3.4.1 Junction Diodes

3.4.2 Bipolar Transistors

3.4.3 MOS Transistors
