

## Examples for Quality Loss by Compression

Here you can see the effect of the different file formats and compressions in some examples

First we look at jpg formats

Illustration

An image as JPEG without compression - Size: 95 kB

An image as JPEG with compression factor 30 - Size: 19 kB

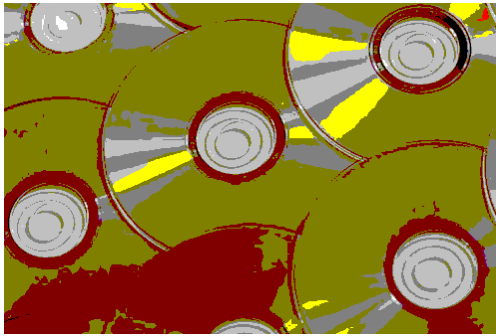

An image as JPEG with compression factor 85 - Size: 8 kB

Next, we consider gif and png

An image as GIF with opimal palette - Size: 76 kB

An image as GIF with standard VGA-palette - Size: 12 kB

The image as PNG - Size: 313 kB
