Management Trainee (f/m/d) - New Energy Systems

You have successfully completed your master’s degree or PhD and now you want to kickstart your career – preferably in an international environment. During our management trainee program, you will quickly assume responsibility for your tasks in the KION New Energy Systems team with a focus on Sustainable Energy Solutions. From the outset, you will be an important part of the KION Group and a member of a collaborative team striving for excellence.

What we offer

- In addition to a multifaceted job, you can look forward to exciting career opportunities and above-market remuneration
- You will quickly gain the skills and experience that ensure cross-functional collaboration based on partnership and trust
- The global orientation of the program is complemented by a 5-month assignment at one of our international locations
- From the start, we will assign you tasks for which you will have individual responsibility, giving you the opportunity to contribute your own ideas
- Your mentor, one of our KION executives, will support you along your journey and will drive your personal development

Tasks

- You will work intensively on the development of energy systems and the integration into forklift trucks as well as the corresponding energy infrastructure
- You will rotate through positions in different departments with a focus on the wide field of energy, e. g. charger systems, fuel cells, battery development, and refurbishment of lithium batteries
- You will also interact with Production, Product Management, and Sales & Service, which are important stakeholders for our energy solutions
- You have a keen interest in team working closely together with the other development departments of the KION Group around the world. This will include topics such as digitalization (IoT, cloud computing, data analytics,...), automation (AGV—Automated Guided Vehicles, AMR—Automated Mobile Robot Platforms,...), and the Warehouse Management/Supply Chain Solutions departments

Requirements

- You have a master’s degree or PhD in engineering, technical business administration, natural sciences, or computer science and are now keen to get practical experience
- You have already acquired initial practical experience in system development – this may include subjects such as requirements engineering and development processes
- You have professional working proficiency in English and ideally already have international experience
- You have strong IT skills - you particularly use MS Office on a daily basis and have experience in systems development tools
- You are a team player with strong communication skills, keen to take on individual responsibility, and work with a high level of initiative to achieve results you can be proud of
- Your knowledge of relevant fields of energy systems and ideally already have
