

Large Pictures to "Luristan Swords"

For some swords used in the "Luristan project", large scale pictures have been made which I will show here to preserve them for eternity. They are shown only ¼ of their original size. You can restore the original size by copying the picture and inserting it into some image processor.

Illustration

IMAS 8 or IR 3744

Here are some high-resolution pictures of sword **IMAS 8** or **IR 3744**. This is the sword that we cut in half. More information about this sword can be found [here](#) and [here](#).

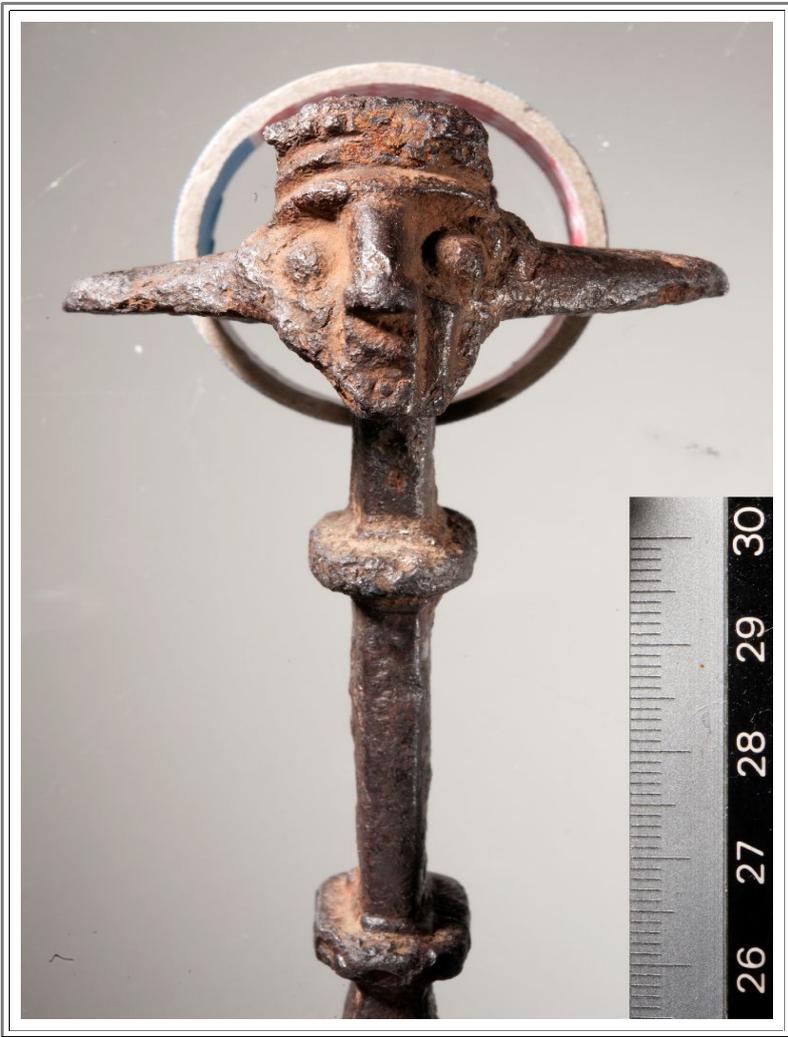

IMAS 9 or IR 3743

Here are some pictures of sword **IMAS 9** or **IR 3743**
More information in [this link](#).

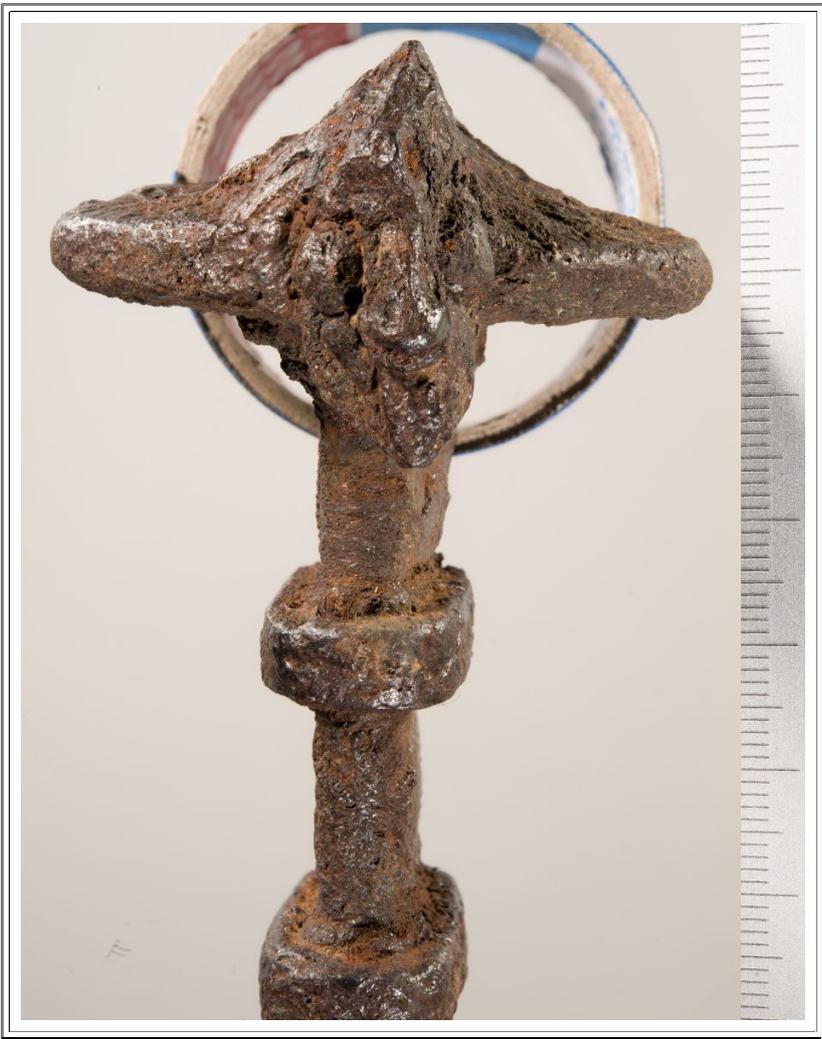

IMAS 10or IR 3745

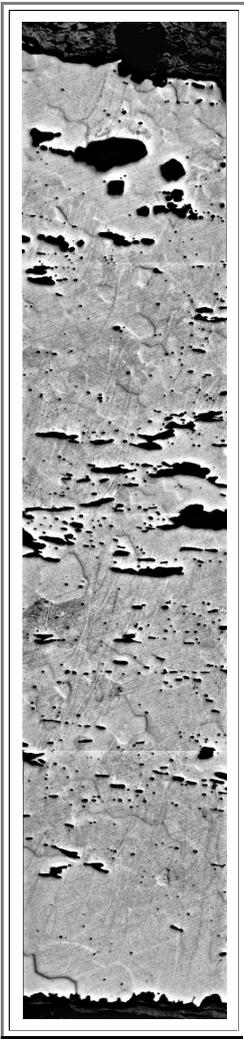

Here are some pictures of sworf **IMAS 10or IR 3745**
Note the unusual "banding" of the grip
More information [here](#)

Note the "banding" pattern at the grip part.

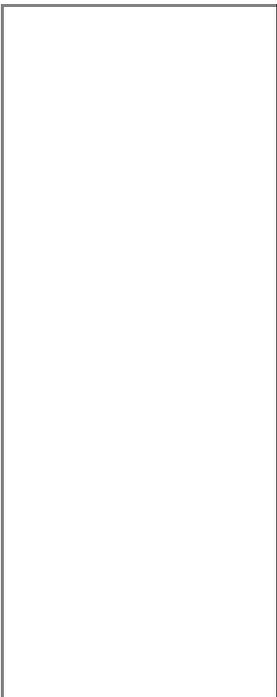

- This is a large-scale picture of the etched cross-section of the blade. Refer to [this link](#) for details. 8ijn "project results".

IMAS 11or IR3746

- ▀ Here are some pictures of sworf **IMAS 11** or **IR3746**
Morer information [here](#).
